

**AMENDMENTS TO THE ABSTRACT**

Please insert the following Abstract after the specification:

There is provided a route guide data creation device for acquiring travel data transmitted from a vehicle traveling on a road according to a predetermined travel route and travel time and creating route guide data according to the data. The route guide data creation device (10) includes: travel data acquisition means (11) for acquiring the travel data over a predetermined period of time; travel data processing means (12) for receiving data based on a predetermined input format from the travel data and calculating the arrival time and departure time at/from each stop for each travel routes and for each vehicle ID; and a route guide database (20) for storing the route guide data including the departure time and the arrival time of each vehicle from/at each stop outputted from the travel data processing means.
